

## Solution Architect – Digital Engineering & Experiences

**Location:** Preferred Location: Bangalore. Mode: Hybrid

**Experience:** 12+ years, with min 6 years in Architect/Sr Architect / Product Owner roles

**Industry:** IT Services / Digital Engineering

### Role Overview

We are a growing IT services organization seeking a **Solution Architect** to provide strong technical leadership in building **AI-powered, cloud-native digital solutions** for global clients. This role is customer-facing and pivotal in translating business requirements into innovative, scalable technology architectures. The architect will also drive the creation of reusable solutions and accelerators on **Azure, AWS, and other cloud platforms** to take to market.

### Key Responsibilities

- Design end-to-end solution architectures aligned to customer business needs, technical requirements, and architectural best practices
- Lead the development of **AI-enabled, digital engineering solutions** and industry-specific use cases
- Create new cloud-based offerings and reusable solution frameworks on **Azure, AWS**, and related platforms
- Act as a trusted technical advisor in client engagements, workshops, and solution discussions
- Drive large-scale **application modernization**, cloud migration, and integration initiatives
- Define architectures covering **front-end, backend, APIs, data, security, DevOps, and cloud infrastructure**
- Ensure solutions are scalable, secure, resilient, and cost-effective
- Collaborate with delivery, pre-sales, and engineering teams to support solutioning and execution

### Required Skills & Experience

- 10+ years of experience in solution architecture, digital engineering, or enterprise application development
- Strong hands-on and architectural experience with **Azure and/or AWS**
- Experience delivering **large application modernization and integration programs**
- Solid understanding of **microservices, APIs, cloud-native architectures, DevOps, and security best practices**
- **Experience of developing engineering tools / accelerators**
- Exposure to one or more domains: **BFSI, Healthcare, Retail, Manufacturing, Digital Media Operations / Ad Ops**
- Proven ability to translate business problems into **innovative technology solutions**
- Excellent communication, presentation, and stakeholder management skills
- Experience working in **customer-facing roles** within IT services organizations
- Proven experience in technical assessment of existing complex applications landscape
- Experience building or productizing solutions for go-to-market
- Knowledge of AI/ML solution design and implementation
- Prior experience with industry accelerators, frameworks, or platforms
- Exposure / experience in building data platforms and analytics
